

Cardinal Products "Produce" a Winning Combination

ON THE JOB: Cardinal dealer Ross Sites and his company, Central Coast Scale, utilized Cardinal products to streamline produce weighing on large trailers for Main Street Produce, Santa Maria, CA.

Central Coast Scale installed a new Cardinal model EPR truck scale with pipe side rails to receive all types of produce coming through the company's system. A Cardinal model 220 digital weight indicator is used to display the vehicle weights.

Cardinal WinVRS software tracks all of the vehicle weighing and is customized to weigh a truck, subtract the trays and pallets, and compute the net weight of the produce. The operator may also enter the dockage, and WinVRS computes it all and then prints a ticket.

Equipment Used:

- EPR Truck Scale
- 220 Weight Indicator
- WinVRS Vehicle Weight Management Software
