

# We've Got Connections

(and we're offering them to you)

## CONNECTIVITY

Easily put **YOUR WEIGHT IN WINDOWS®** with Cardinal's WinDDE 2.0 Server. Communicate with up to 20 weight indicators connected to a computer via standard serial port or optional Ethernet (using TCP/IP). WinDDE allows the weight and status of the indicators to be transferred directly into spreadsheets, databases, and industrial control applications by means of Dynamic Data Exchange.

◀ Continuous monitoring of weight in Excel® while updating bar graphs in real time.

◀ Threshold weights can be set to automatically capture weight and time/date stamp in Excel® files.

◀ Capture weight ticket information in Excel® each time the PRINT key is pressed.

Combine Cardinal's 200 and 700 series family of indicators (shown to the left) with WinDDE to create a connected weighing system that works for you!
