

GUARDIAN

EPR Guardian™ Series

TRUCK SCALES

Ensure Longevity of Weighing

Cardinal Scale Mfg. Co. takes **great pride** in the construction of our steel truck scale bridges to insure you get the longest use possible from your investment.

We prepare and clean the steel surfaces by **shot-blasting every steel component** to an SSPC-SP6 condition to remove rust and mill residue.

Once the scale bridges are completely welded, Cardinal then protects the scale by baking a **Sherwin Williams EPOLON™ II epoxy coating** on each component. Your Guardian™ Hydraulic Truck Scale is completely protected from environmental and extreme weather conditions.

All **Cardinal load cells** are made of the highest-quality **stainless steel** providing guarded protection from the elements for years to come. As a single source supplier of all truck scale components, we insure years of weighing from a Cardinal Truck Scale.
